

AN/PAQ-4C Aiming Light

The AN/PAQ-4 Aiming Light, used in conjunction with night vision goggles to direct weapon fire at night, enables highly accurate laser aiming in darkness at maximum firing distances. AN/PAQ-4 provides an invisible, continuous infrared beam along the weapon's line of fire, highlighting the point of impact on the target.

AN/PAQ-4C

Performance Characteristics

- 12-inch membrane cable switch
- 20-inch remote cable switch
- 25-inch remote cable switch
- vBoresight filter
- Bracket adapter for mounting the system to U.S. military standard M60 and M2 brackets
- Cable hangers
- Hard carrying case
- M4/M16A2 Universal Bracket
- Operator and unit maintenance manual
- Rail Grabber Bracket Assembly (IAW MIL-STD-1913)
- Soft carrying case
- Switch lever shroud
- Two AA batteries
